1 Product description

1.1 Controlunit EXmatic 450

EXmatic 450 is a pneumatic control unit for retractable holder, such as EXtract. The control unit is to drive the holder from position "maintenance" "into the "measuring" position and back again. The reached position is acknowledged over pneumatic lamps. Manual pneumatic buttons are integrated to control different rinsing solutions.

1.2 Process integration

The control unit EXMATIC 450 is supplied compressed air 4-6 bar. The connection of the interchangeable fitting and the cleaning and drain valves is realized by pneumatic hoses which are gathered in a multi hose.

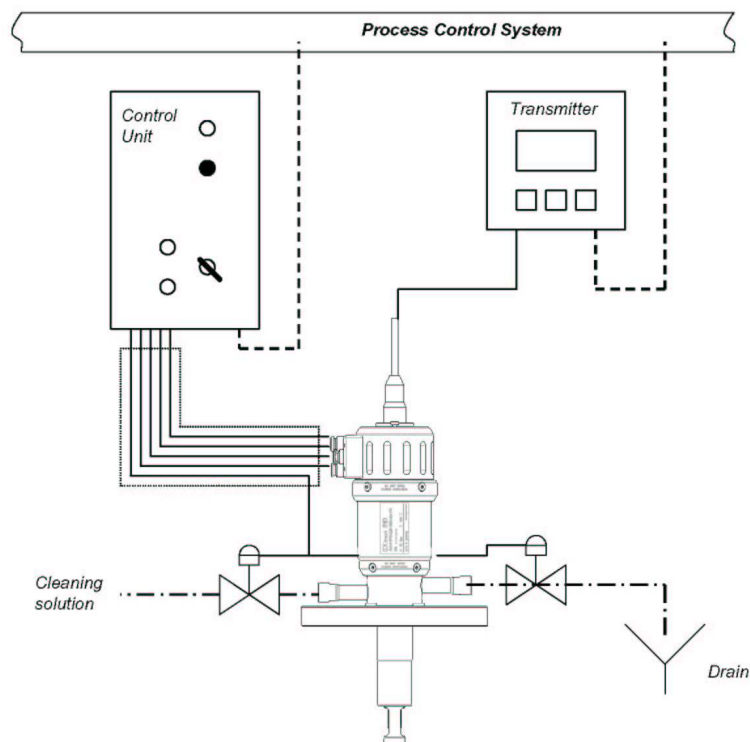

Figure 3: Process sequence

2 Installation

Connect the air supply on the bottom side of the control unit.

use

- pneumatic tube $\varnothing = 6\text{mm}$.
- filtered ($40\ \mu\text{m}$), water-free and deoiled compressed air only

Connect the multi hose on the bottom side of the control unit

Inside the box, connect the tubes as follows:

- $\varnothing = 6\text{mm}$ blue = \varnothing 6mm blue
- $\varnothing = 6\text{mm}$ black = \varnothing 6mm black
- $\varnothing = 6\text{mm}$ red = \varnothing 6mm red
- $\varnothing = 6\text{mm}$ green = \varnothing 6mm green
- $\varnothing = 6\text{mm}$ yellow = \varnothing 6mm yellow
- $\varnothing = 4\text{mm}$ blue = \varnothing 4mm blue
- $\varnothing = 4\text{mm}$ black = \varnothing 4mm black

Connect the tubes to the holder / valves as follows:

to holder

tube \varnothing = 6mm black in connection 1 (black) for air supply measuring.

tube \varnothing = 4mm black in connection 3 (black) for the reply signal "measuring".

tube \varnothing = 6mm blue in connection 2 (blue) for the air supply service

tube \varnothing = 4mm blue in connection 4 (blue) for the reply signal "service"

to valves

tube \varnothing = 6mm red to the drain valve

tube \varnothing = 6mm yellow to cleaning valve 1

tube \varnothing = 6mm green to cleaning valve 2

3 Function

To drive the holder from position service to process and back again, turn the black switch "Armature Position".

You will get a feedback of the position on the pneumatic lamps.

To start a cleaning, push button "Cleaning I" for the first cleaning solution and button "Cleaning II" for a second cleaning solution. The cleaning runs as long as you push the button.

The feedback signal indicates that the cleaning is running.
