

ECI-03 Communication Interface

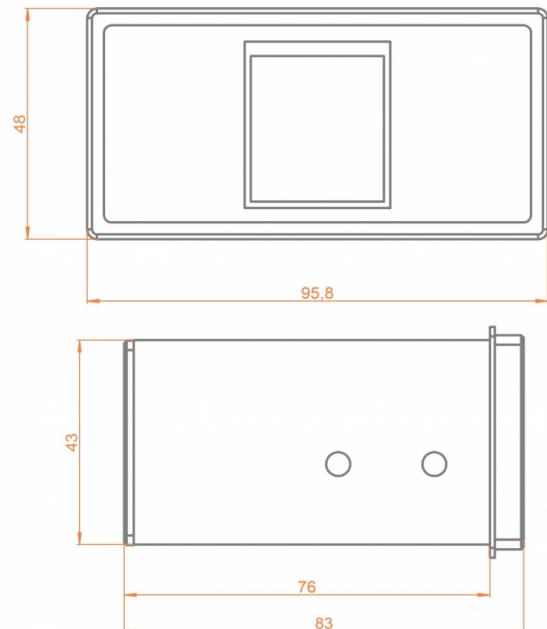

- » Compact design
- » Easy and fast sensor parameterization
- » Direct display of the measured data
- » Standardized dimensions for panel mounting
- » Easy operation via touch display

With the Exner Communication Interface ECI-03, the measured values of the optical sensors EXcell are displayed on a graphic display, converted to a standardized 0/4 ... 20 mA interface and the sensor is supplied with the necessary voltage.

Specifications

Housing:	48x95,8 mm
Power supply:	24 V DC (12...36 V DC)
Output:	0/4...20 mA
Limit contact:	24 V, 100 mA PNP
Alarm contact:	24 V, 100 mA PNP
Input:	Sensor EXcell
Display:	25x29mm (touch display)
Accessories:	Connection cable 2m / 5m
