# REMOTE OPTICAL WATCHER

The ROW is an autonomous non-contact sensor for the detection of oil on water. It monitors industrial sites for oil spills and leaks so you can respond quickly. Protect drinking water sources and safe-guards heavy industrial equipment from lubricant oil leaks; protect the environment.

## › 24/7 OPERATION EVEN IN HARSH ENVIRONMENTS

Day or night, in arctic cold or scorching heat, the ROW helps you pinpoint the polluters, take action, and avoid lasting damage. The sensor is available in aluminum, stainless steel or ATEX EXD enclosures.

## ROW DETECTS\*:

motor oil, turbine oil, vegetable oil, fuel oil, marine diesel oil, crude oil, heating oil, lube oil, hydraulic oil, gas oil, mineral oil

\* Different oils from each country have different properties. Check with LDI or send samples for testing.

## › LONG LIFE, GO OFF-GRID

Robust IP68 certified hermetic design and 5 year LED lifetime. Low power consumption of < 2W with optional remote operation using solar panels, batteries and wireless telemetry.

## › NON-CONTACT DETECTION INSTRUMENT

This means easier installation, no bio-fouling, and no maintenance.

## › INDUSTRIAL LEADING SENSITIVITY

With almost 30 years of experience in R&D, LDI has created the ROW that uses UV LED light to excite oil's native fluorescence. The ROW's photo-optics can detect oil films down to 1  $\mu$ m layer, while minimizing false alarms.
